

## ABSTRACT OF THE DISCLOSURE

When a digital camera 100 is connected to an  
information processing apparatus 101 so that they can  
5 communicate with each other, the digital camera 100  
generates partial information of attribute information  
related to each image data stored in the camera 100,  
and transmits the partial information of the attribute  
information to the information processing apparatus 101.
